PROJECTS --

● Blogging Site Backend :

Role: Backend Developer, Tech Stack: JavaScript, NodeJS,

In this project, we have created 7 APIs for author and blog schema by using these APIs we performed **CRUD** Operations on **MongoDB.**

● Books Management :

Role: Backend Developer, Tech Stack: JavaScript, NodeJS,

The backend work, same as of **Audible** where a user can store a book data. People can comment on it. We also used **AWS S3** to upload book images.

● Shopping Cart :

Role: Backend Developer, Tech Stack: JavaScript, NodeJS,

In this project, we have created 4 Schema's and 15 APIs in which we have also used **JWT, Bcrypt, AWS S3** to perform several actions.

● Open to Intern :

Role: Backend Developer, Tech Stack: JavaScript, NodeJS,

In this project, we have created 2 Schema's and created 3 APIs which can be used by colleges or universities to hire interns and to keep the record of same.

● URL Shortener :

Role: Backend Developer, Tech Stack: JavaScript, NodeJS,

In this Project, we have created 1 schema and 2 APIs which is based on Caching and Redis server. This works same as **Short URL** another famous URL shortener website.
